

Frank McNulty

• Available for contract roles

London, UK · 07584 575435

me@frankk.dev

frankk.dev · LinkedIn

Senior Frontend Engineer – React, Next.js, TypeScript

• (01) PROFILE

Frontend engineer with five years across agency, product, and SaaS teams. I join established codebases quickly, ship production features with minimal onboarding, and leave systems cleaner and faster than I found them – from high-traffic campaigns for Google and Candy Crush to RevuKit, a SaaS product I founded, built, and run.

• (02) SKILLS

Core	TypeScript, JavaScript, React, Next.js, Node.js
Interface	Tailwind CSS, Framer Motion, design systems, animation, WebGL and canvas
Platforms	Firebase, Contentful, AWS, Vercel, Shopify, REST and third-party APIs
Practice	Frontend architecture, performance, accessibility, refactoring, Agile delivery

• (03) EXPERIENCE

Node London

AUG 2022 – PRESENT

Developer → Lead Developer → Senior Contract Developer

- Deliver high-performance frontend features for agency client projects on React and Next.js stacks.
- Integrate into existing codebases quickly, improving structure, performance, and architecture.
- Work with design, backend, and product teams to ship production-ready features on tight timelines.

Linius (now Ion)

MAR 2021 – JUL 2022

Junior Developer → Mid Developer

- One of two engineers leading frontend on the Whizzard platform, owning UI architecture, component design, and core features.

• (04) PROJECTS

RevuKit – Founder

Next.js · TypeScript · Node · Firebase [REVUKIT.COM](https://revukit.com)

The leading Google Reviews plugin in the Framer ecosystem, used by customers worldwide across Framer, WordPress, and the web. Designed, built, and run end to end: widget editor, live preview, review sync, embeds, and dashboard. Also built Instagram Feed, the leading social feed plugin for Framer.

Candy Crush · King

Next.js · Tailwind · Vercel 2026

Co-developed Candy Roadhouse for Candy Crush Music Season '26: a static-first Next.js site served from the edge, with server-validated prize codes, sustaining very high traffic through a global launch.

Google Pixel × Arsenal FC, Liverpool FC

Next.js · TypeScript · Firebase 2024 – 2025

Two consecutive campaigns for the same client team, built for a high-volume mobile audience in India: a data-driven quiz engine, server-authoritative real-time scoring, and referral mechanics.

BBC StoryWorks

React · TypeScript · Tailwind 2023 – 2025

Four editorial platforms for clients including Deloitte, the World Energy Council, and the International Council of Nurses, with scroll-led storytelling built to BBC accessibility standards.

Solmax

Next.js · Contentful 2024

Co-developed a multi-language, multi-region platform for a global manufacturer, with a Contentful model regional teams publish with independently.

Fuze Tea · Coca-Cola

React · Firebase 2023

Real-time backend and interaction layer for a live billboard campaign.

Also contracted for [Brief](#). Case studies at frankk.dev.

• (05) EDUCATION

UWE Bristol – BSc (Hons) Audio and Music Technology, 2:1

2014 – 2017

Technical grounding in software development, including programming in C.
